Dear Editor,

Re: Resubmission of a manuscript for publication

I am hereby re-submitting a manuscript titled “The impact of anthelmintic treatment intervention on malaria infection and anaemia in school and preschool children in Magu district, Tanzania: An open label randomised” for consideration for publication into your journal BMC Infectious Diseases. In this revised manuscript, I have addressed all the comments put forwards by reviewers who revised the first draft of the manuscript I submitted. As in the original manuscript, the information contained in this manuscript is original work and has not been submitted to any other journal for publication. I have read and understood your journal policies and have adhered to them. The choice of your journal have based on the possibility of wider dissemination of information following publication, open access and speed of article processing. I will be grateful if this revised manuscript is accepted for publication.

Kind regards,

Safari M. Kinung’hi, PhD
Principal Research Scientist
