Reviewer’s report

Title: Anti-emetic mechanisms of Zingiber officinale against cisplatin induced emesis in the pigeon; behavioral and neurochemical correlates

Version: 1  Date: 20 July 2014

Reviewer: Muhammad Zia-Ul-Haq

Reviewer’s report:

Dear Sir

I have gone through manuscript thoroughly. The study although novel is very limited and supported by only 1 animal model. I therefore don’t recommend its publication in journal. Models/manufacturers of instruments like HPLC are not mentioned in methods section. Even ZO authentication has not been provided. No pic of histolology has been provided.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
