Reviewer’s report

Title: Clinical significance of serum triglyceride elevation at early stage of acute biliary pancreatitis

Version: 2  Date: 13 October 2014

Reviewer: Claudia Stefanutti

Reviewer’s report:

Major Compulsory Revisions

1. There is no mention of treatment. The ms deserves a comment on how treatment (and which kind of treatment) may affect the outcome of the study and to what extent this may influence the conclusive remarks on results proposed by the Authors;

2. Table 2. Page 19: Change C-reaction protein in C.reactive protein;

3. The list of references is excessively short and not enough updated. Check the international literature and update the list. Comment the new references that will be added in the text, accordingly.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
